

Patients Name: _____ DOB: _____ DOS: _____

Pulmonary Function Test Report

Interpretation Based on Pulmonary Function Test Findings:

- ☐ Normal
- ☐ Pulmonary Vascular Disorder
- ☐ Chest Wall and Neuromuscular Disorders
- ☐ Interstitial Lung Disease/Pneumonitis
- ☐ Asthma/Chronic Bronchitis
- ☐ Emphysema

Recommendations:

- ☐ Referral to a pulmonologist for comprehensive assessment and management.
- ☐ Smoking cessation counseling if applicable.

The interpretation of PFT results is based on standard reference values and clinical guidelines. However, individual patient factors, including medical history, symptoms, and other diagnostic tests, must be considered for an accurate assessment.

The interpreting physician is not responsible for any clinical decisions made based on this report without a comprehensive evaluation of the patient.
